

K-Smart AI Technology System

KColour ATM System Upgrade Version

Overview

Intelligent color formulation system utilizing AI and large data. K-Smart creates paint in the color desired by clients in just five minutes.

Big Data Analytics

Analysis of KCC color data

Artificial Intelligence

Self-learning color data
Derive the best color combination through deep-learning (Artificial Intelligence)

K-Smart

Human → **Big Data & AI**
Subject/variable → **Objective / Constant**
Repeated experiment → **Logical Judgment**
Result value → **Optical Color Formulation**

Advantages

- AI Color Matching
- Increase in Color Accuracy
- Cost Effectiveness
- Faster Dosing Speed

*You are encourage with online connection, you can connect in five minutes or less to the KCC HQ in Korea for the desired formulation result and "unlimited color selection."

*The installation is scheduled to take place between February and April of 2024.
